Dionny Jose Núñez Márquez

Electronic Engineer | Software Developer and Industrial Maintenance

dionnyn@gmail.com | +58 414 6795706 | +58 412 1763710 | Venezuela | github.com/cityny | linkedin.com/in/dionnyn

PROFESSIONAL PROFILE

Electronic Engineer and Software Developer focused on automation and infrastructure. Experience in critical industrial maintenance (Tetra Pak systems, PLC) and deployment of technological solutions (VPS, n8n, Full-Stack development). Oriented towards problem-solving and process optimization under strict quality standards.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android

Backend Development: Node.js, Python, JavaScript

DevOps: Docker, GitHub Actions, Alpine Linux, Ubuntu, Vercel

Databases: PostgreSQL, Supabase

Automation: n8n, WhatsApp

Microsoft 365: Excel, Word, PowerPoint

Data Analysis: Data Entry, Data Analyst

Languages: Spanish (Native), English (Intermediate B1 · EF SET)

WORK EXPERIENCE

Procurement Engineer
Emporio Group | 05/2026 – Present

- International Procurement: Purchasing of spare parts and industrial machinery from international suppliers and tracking of each order until its arrival in Venezuela, with direct communication with Asian suppliers.
- Technical Design: Preparation of designs and drawings in AutoCAD to specify equipment and parts.
- Quality: Monitoring of and compliance with ISO standards in purchasing processes and with suppliers.

Industrial Maintenance Supervisor
San Simón Planta de Leche | 01/2022 – 03/2026

- Automation and Control: Operational restoration of Tetra Pak TBA/8 filling machines (GE Fanuc PLC) and correction of logic faults in Fabrima equipment through blueprint analysis.
- Infrastructure: Execution of cooling tower assembly (with international English support) and design of bypasses in critical pipelines to guarantee operational continuity.

Robotics Teacher
Fundasteam - Panama | 01/2021 – 12/2021

- STEAM Instruction: Facilitation of Python and robotics fundamentals for youth groups via virtual environments.
- Pedagogical Management: Design of gamified experiences and tracking of project-based academic traceability (PBL).

Field Interviewer
Ingeolan - Venezuela | 01/2020

- Execution of direct mass field selection and interview processes for the detection of socio-labor profiles.
- Evaluation of analytical and technical competencies, ensuring the efficient filtering of qualified candidates.

Laboratory Assistant
URBE | 04/2015 – 09/2020

- Configuration, calibration and testing of measurement equipment benches (oscilloscopes, generators) prior to engineering practices.
- Proactive technical support and electronic safety normative guidance for teachers and student body.

EDUCATION

Universidad Rafael Belloso Chacín | 2015 – 2020
Electronic Engineering

COURSES AND CERTIFICATIONS

IT Support Troubleshooting (Tier I) — Appoint Pros | 03/2023

Network Design Fundamentals — LinkedIn Learning | 01/2022

Cybersecurity at Work — Google España | 10/2020

Cloud Computing — Google España | 10/2020

Residential and Commercial Photovoltaic Solar Systems Installation — Solar 20 Energías Renovables | 03/2020

Environment, Health and Safety (EHS) — Universidad Rafael Belloso Chacín | 10/2016

Introduction to Residential Electrical Installations — Universidad Privada del Norte (Miríadax) | 08/2014

FEATURED PROJECTS

Control Tower
Web dashboard to monitor multiple servers —plus Windows and Mac machines— from a single place: what each one consumes, what is failing and what needs renewing. Read-only by design, with automatic alerts, and self-hosted on the user's own server.
Technologies & Skills: Python, Flet, Docker, SQLite, Linux

Fabrima Filling Machine Exploded-View Drawing
Exploded-view drawing of a Fabrima filling machine, produced under time pressure using Microsoft PowerPoint as the tool at hand.
Technologies & Skills: PowerPoint, Design, Problem Solving

Interactive Single-Line Diagram - Furniture Plant
Interactive single-line diagram of a furniture plant: 12.47 kV grid, main and backup transformers, 3 DRUPS units and 6 production lines, with a real-time load panel (kW, kVA and % of capacity).
Technologies & Skills: Electrical Design, Rive, JavaScript, Supabase

Cooling Tower Assembly - San Simón
Direct supervision and collaboration in the assembly of a cooling tower for the San Simón Milk Plant (El Guayabo).
Technologies & Skills: Leadership, Assertive Communication, Teamwork, Technical Supervision, Planning

BVC Commission Calculator
Fast and accurate commission and fee calculator for BVC operations with Suma Valores.
Technologies & Skills: React, Vite, Tailwind CSS, Netlify

Smart Work-Cycle Planner
Generates a full-year PDF calendar for rotating cycles based on start date, leave/return days and work period duration.
Technologies & Skills: TypeScript, React, Vite, TailwindCSS

Deuda Flow
Manage personal debts and loans, track contacts, and keep a clear history of transactions from your phone.
Technologies & Skills: Flutter, Supabase, PostgreSQL, Android
